

HTF T3 HORIZONTAL TRAY FORMER

SWF's HTF T3 Horizontal Tray Formers, powered by TECO, are reliable and user-friendly machines designed for folding and gluing cardboard trays with reinforced corner posts. This versatile machine can be customized with forming sections for either Citrus or P84, making it perfect for packaging fruits and vegetables. With its high productivity and quick changeover time, it offers a great price-quality ratio, making it a popular choice among customers. The machine is also capable of being fitted with short and long side double folding devices, providing even more flexibility.

HTF T3 Horizontal Tray Former for Corrugated Board Trays
